

CCUS Market Intelligence

Decision-ready intelligence for the CCUS value chain.

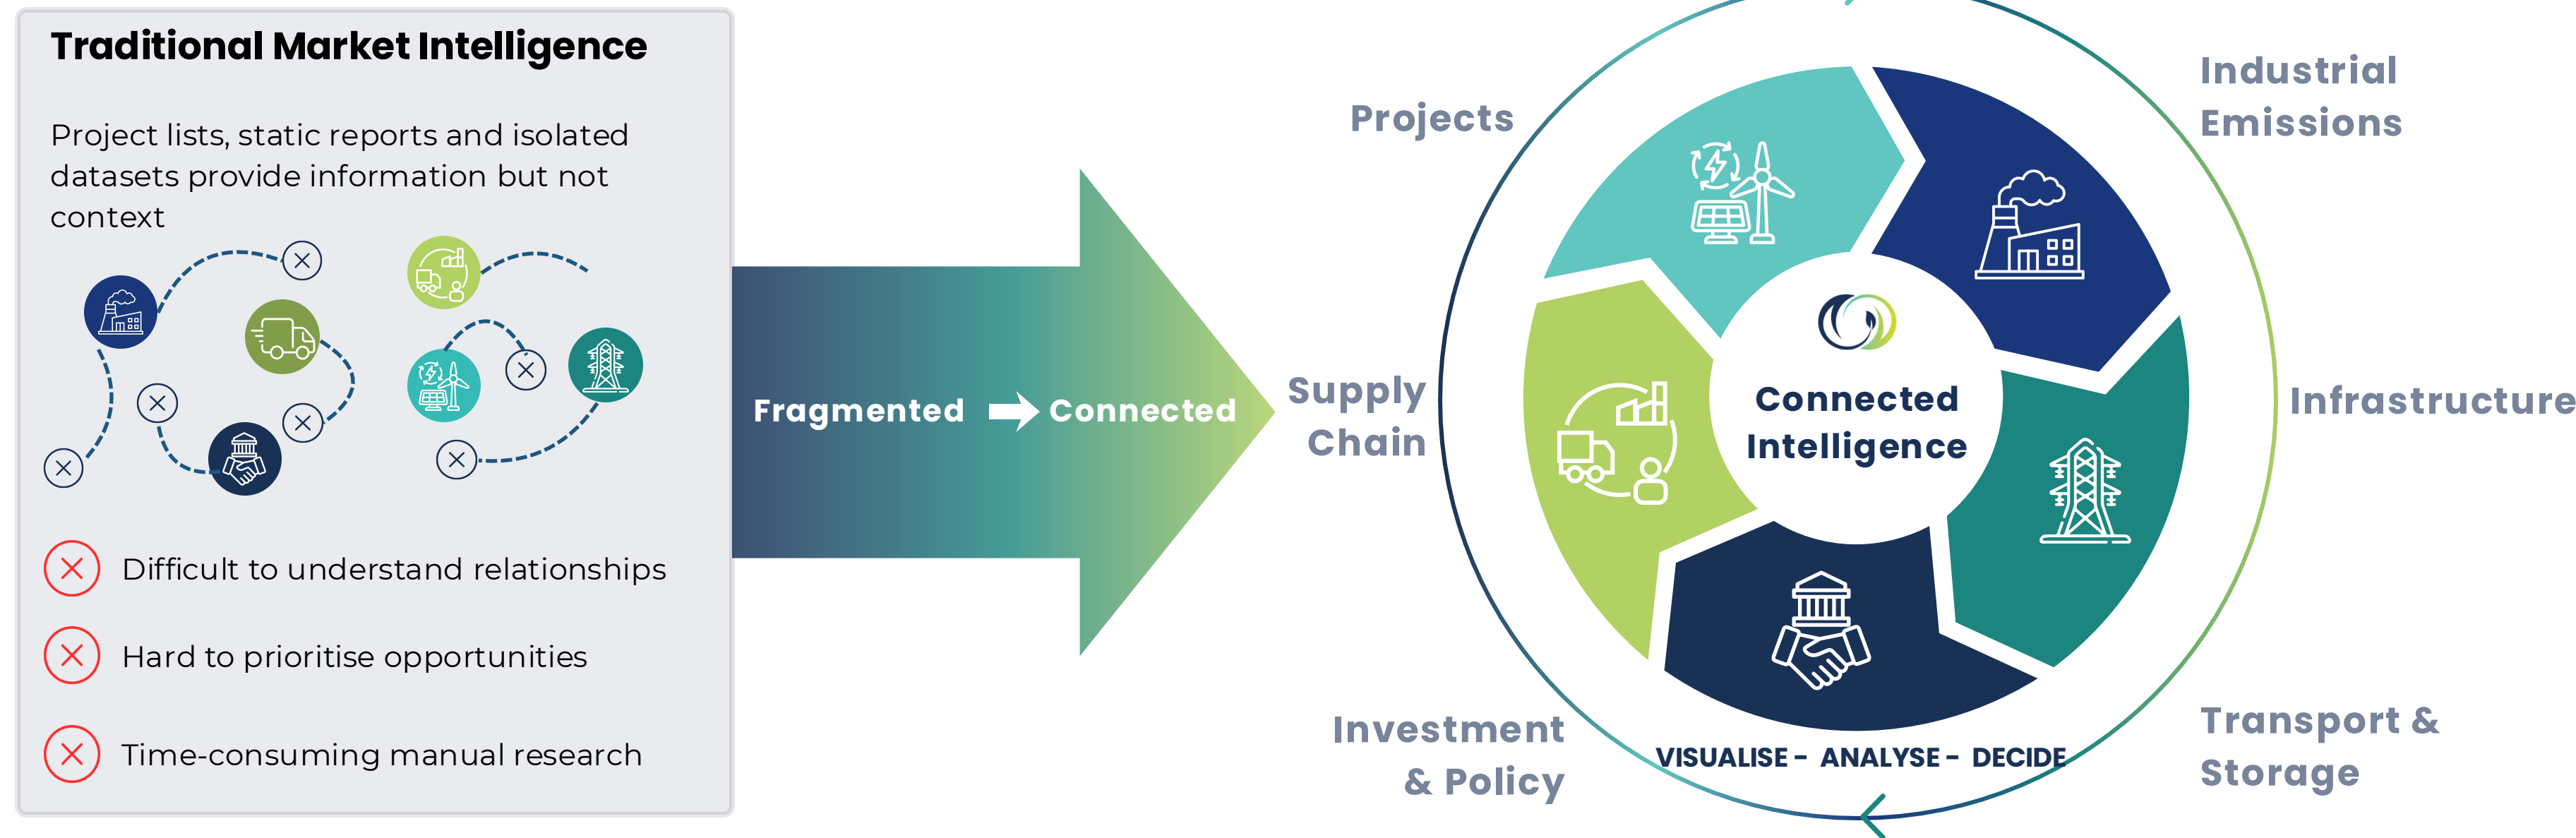

Connected intelligence for the carbon capture value chain.

olsights.com

CCUS Decisions Depend on More Than Projects

Most market intelligence platforms focus on projects. Olsights connects projects, infrastructure, industrial emissions, transport, policy and supply chains into one connected intelligence platform helping you identify the opportunities that matter most.

Most platforms tell you where projects are.

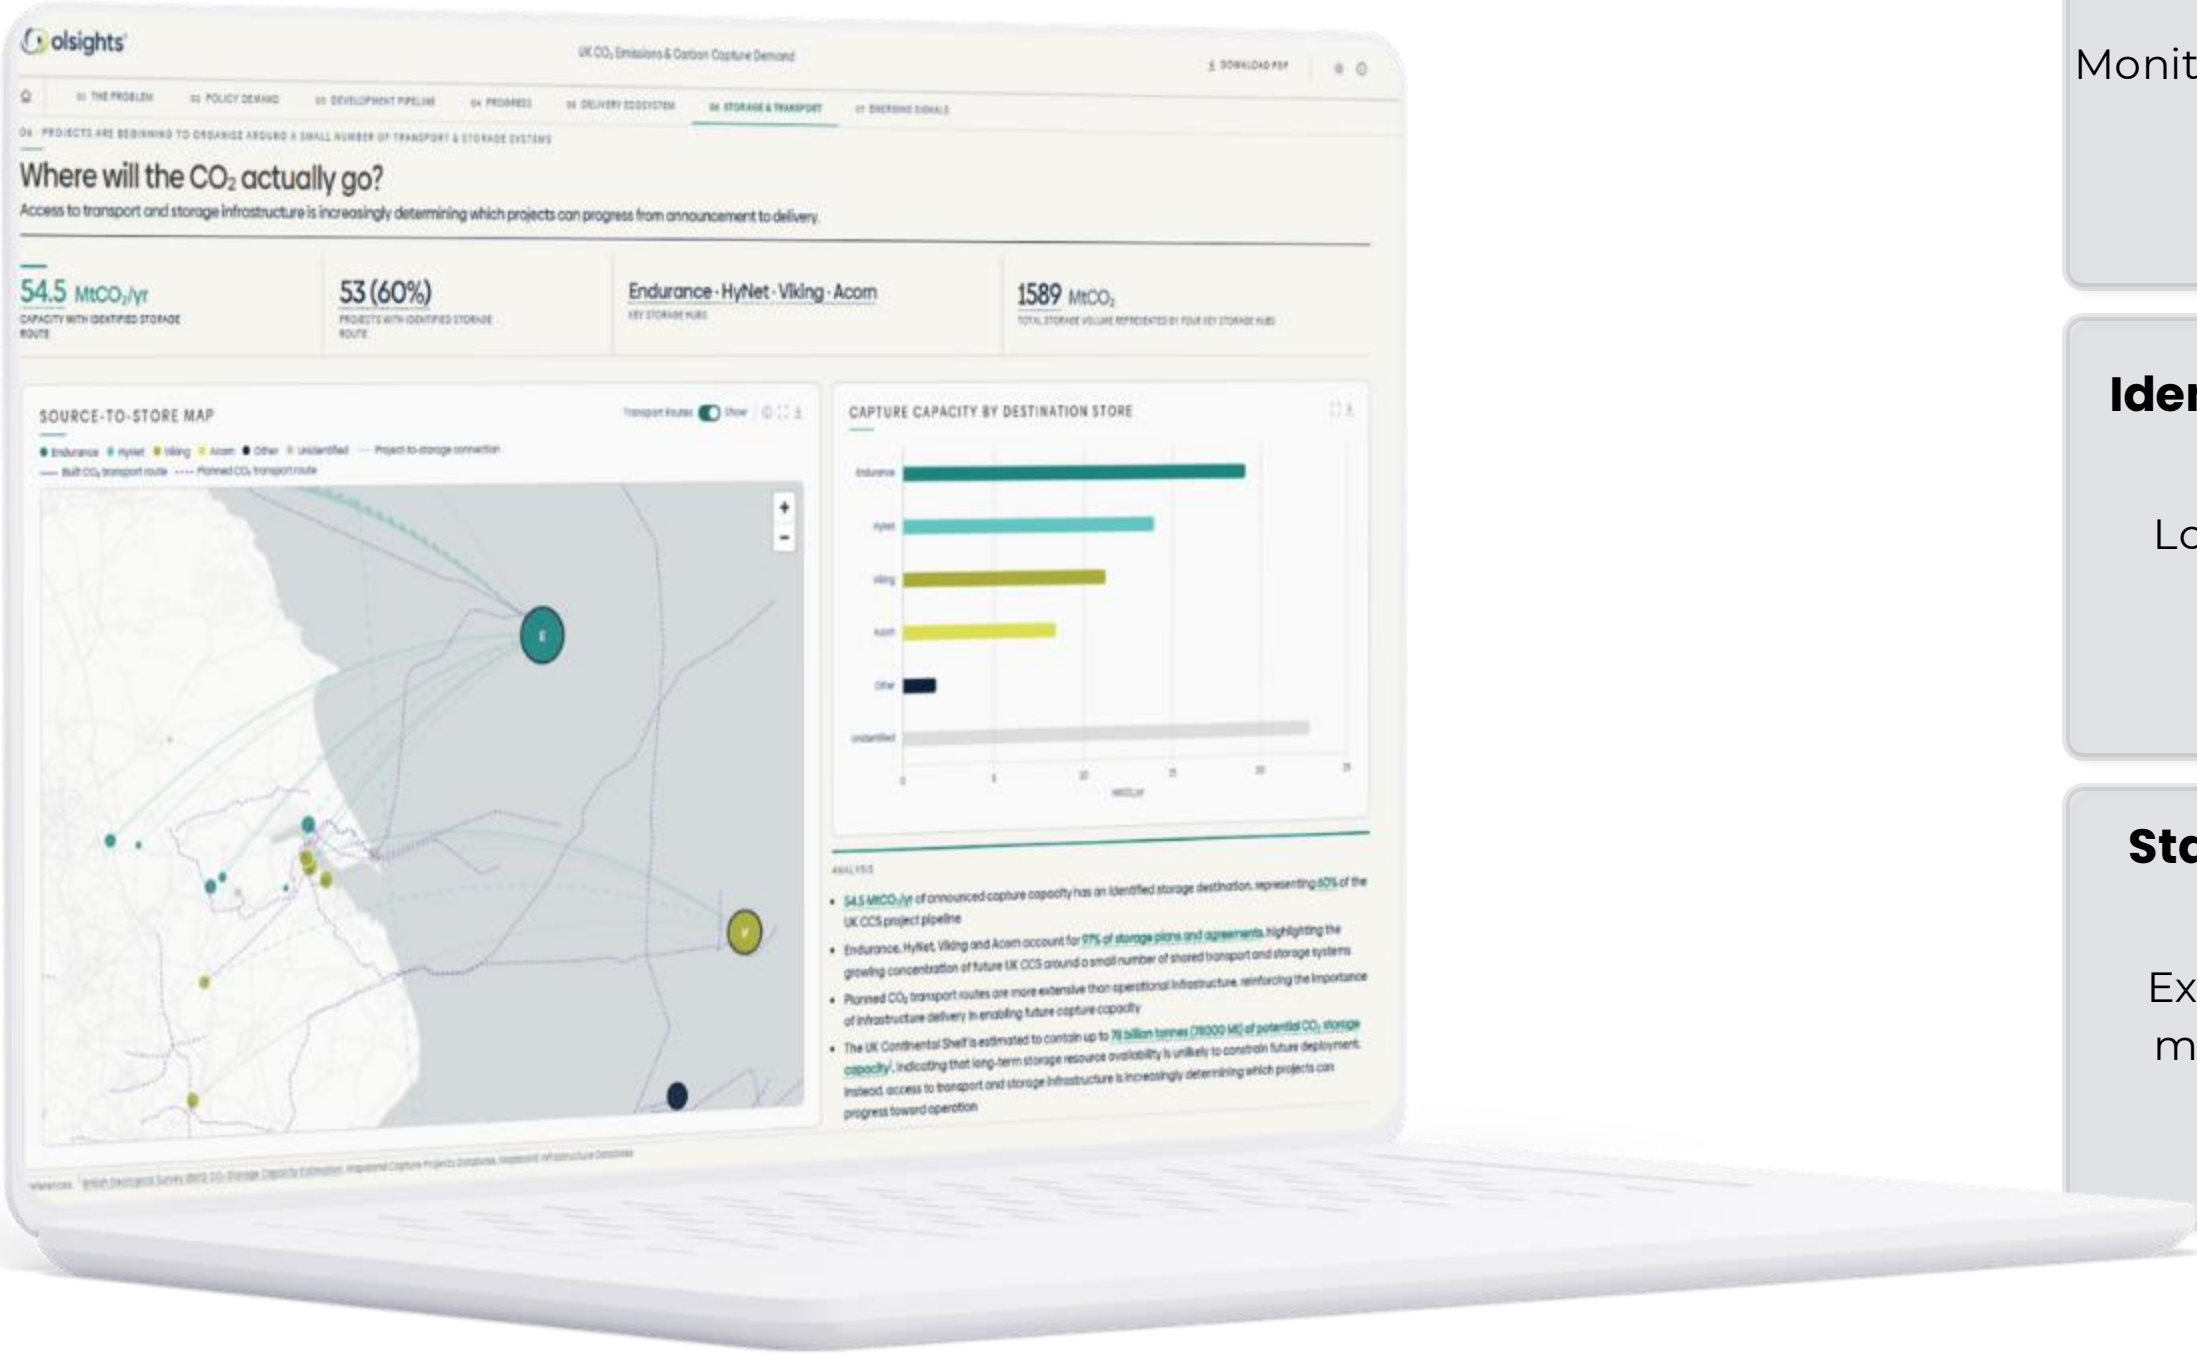

Olsights helps you understand which opportunities matter and why.

Beyond Static Market Reports

Quarterly market intelligence combining expert analysis with interactive dashboards to help you identify opportunities, understand markets and make better commercial decisions.

Read the analysis. Explore the evidence. Make confident decisions.

Track Project Pipelines

Monitor operational, planned and emerging projects.

Understand Infrastructure

Track transport, storage and network developments.

Identify Industrial Clusters

Locate major emitters and regional opportunities.

Find Delivery Partners

Identify developers, suppliers and technology partners across the CCUS value chain.

Stay Ahead of the Market

Expert analysis of the latest market developments and investment activity.

Explore the Data

Filter, compare and export charts and data instantly.

More than a PDF. Every report combines expert insight with interactive dashboards, allowing you to explore the data behind every trend.

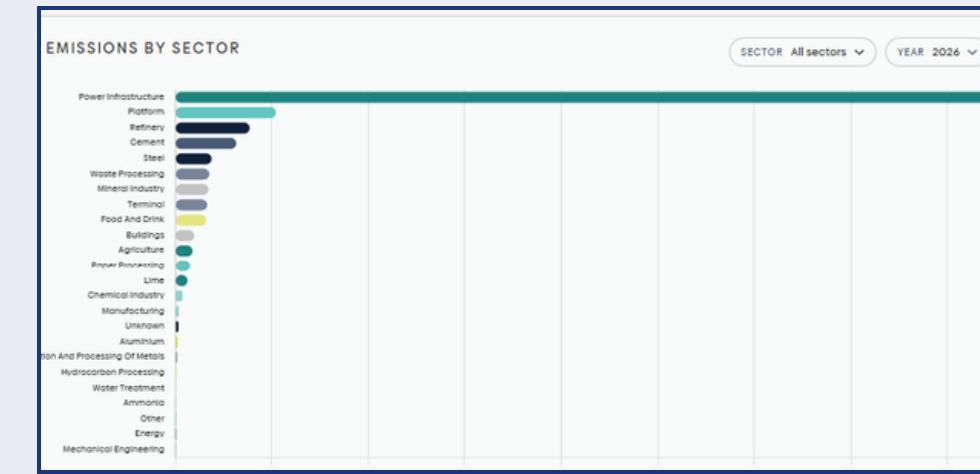

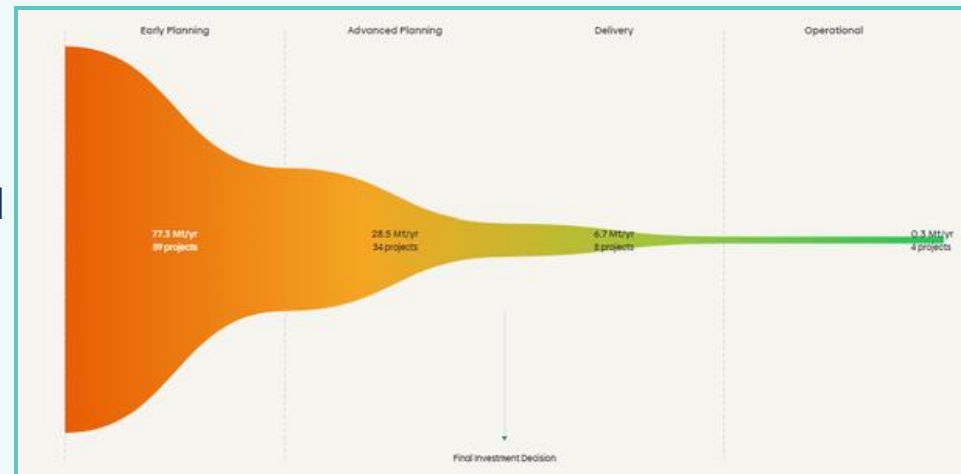

Discover the Insights That Drive Better Decisions

Every chart, map and dashboard is linked to the underlying market data, allowing you to move seamlessly from high-level trends to individual projects, assets and commercial opportunities.

Know where tomorrow's opportunities are emerging

Monitor operational, planned and emerging CCUS developments to identify future opportunities.

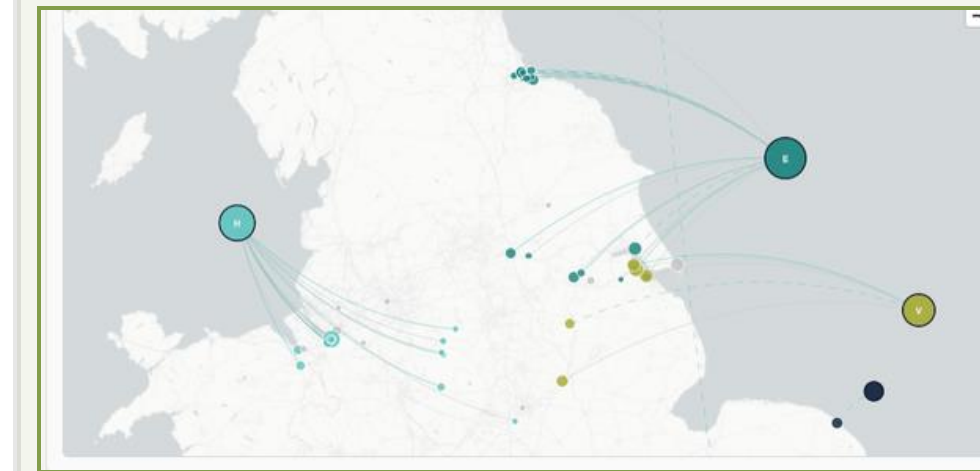

Analyse Industrial Clusters

Locate major emitters, analyse regional clusters and uncover carbon capture opportunities.

Identify regions ready for deployment

Track transport networks, storage sites and supporting infrastructure to assess market readiness.

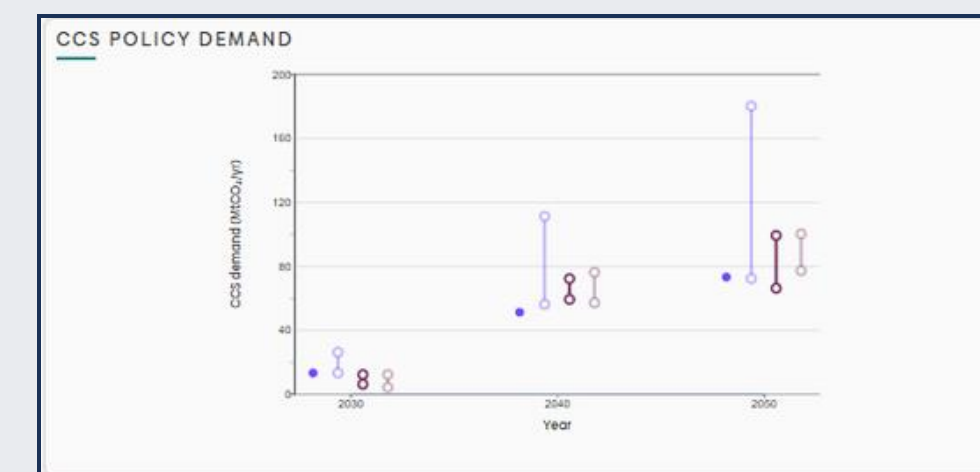

Explore the Data

Interact with maps, dashboards and charts to filter, compare and export the insights you need.

Find the organisations already delivering projects

Identify developers, EPCs, technology providers and supply chain partners across the CCUS value chain.

Stay Ahead of the Market

Keep up with investment, policy and market developments through expert quarterly analysis.

Every Report Includes a Live Intelligence Platform

Every Digital Market Intelligence Report is powered by the Olsights Eye platform, giving your team the ability to explore live market intelligence, investigate opportunities and answer their own questions.

1 — Interactive Mapping

Explore connected projects, infrastructure and markets.

2 — Connected Dashboards

Move seamlessly between maps, dashboards and analytics.

3 — Advanced Filters

Find the projects, regions and technologies that matter most.

4 — Scenario Comparison

Compare markets, technologies and investment opportunities.

5 — Export Insights

Export charts, data and reports for further analysis.

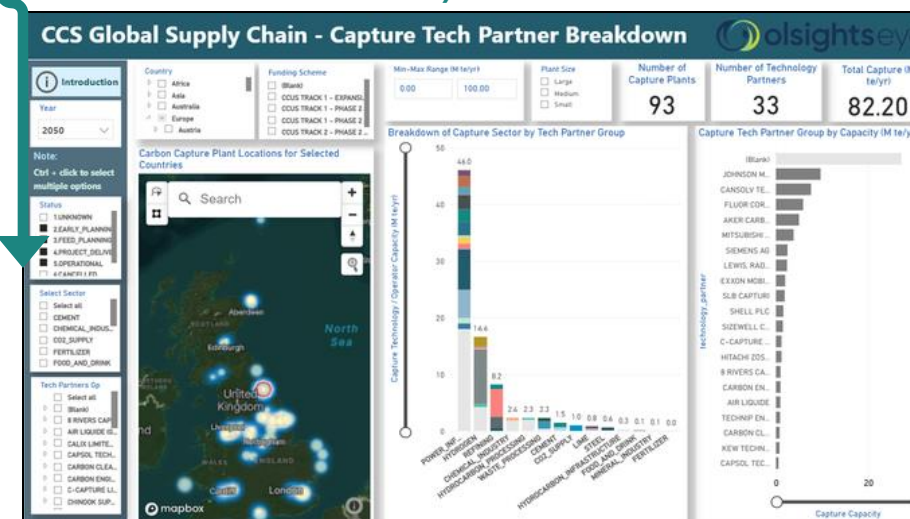

6 — Frequently Updated

Powered by continuously evolving datasets.

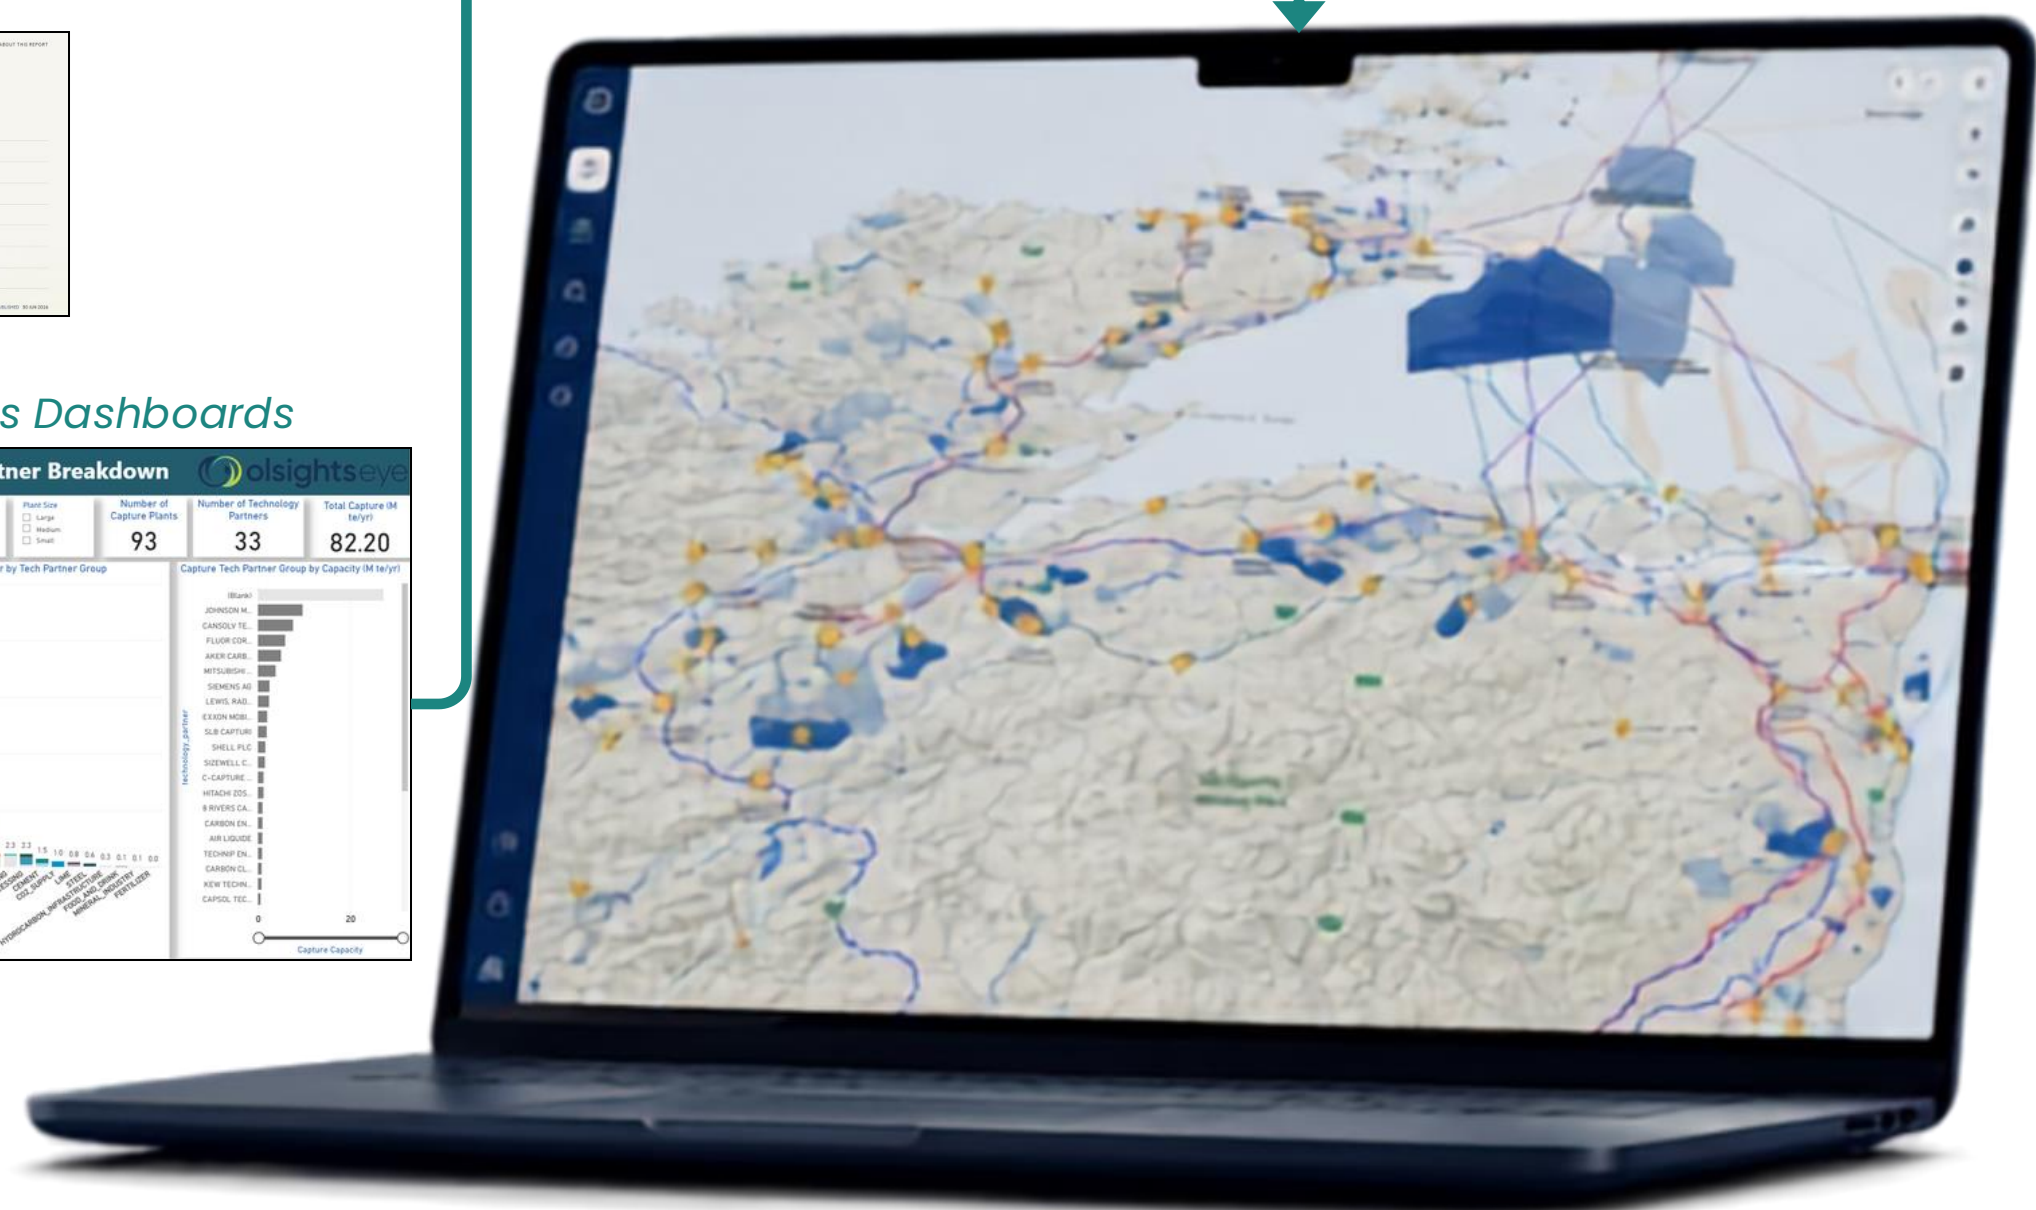

Intelligence Reports

Filterable Analytics Dashboards
